SUPPLIER ONBOARDING AGENT · PRESENTER GUIDE

Demo recording script

Everything you need to record the 3-minute demo video: what to set up, then for every scene what to click, what to point at, and what to say.

Length: **about 3:00** | Opening: **30 s on the problem** | Scenes: **8 clicks**

Cost per run: **$0** (saved answers) | Rehearse: **as many times as you like**

Before you record

1. Open **http://localhost:8000** in your browser. If the page doesn't load, open Terminal in the project folder and run:

   ```
   .venv/bin/uvicorn app.main:app --port 8000
   ```

2. Make the browser full screen. If the page doesn't fit, zoom out to 90% with **Cmd + −**.
3. Do one full practice run, then click **Start over**.
4. Start the screen recorder. QuickTime: **File → New Screen Recording**, then choose to record the browser window.

The run

CLICK what to press | POINT AT where to move the mouse | SAY your voice-over

0a

~10 s

0:00

Open on the problem

POINT AT — The headline on the start page: “Adding a new supplier takes weeks. Stealing their payments takes one email.”

SAY — *“Before a company can pay a new supplier, someone has to collect and check a stack of documents: the commercial registration, the VAT certificate, the bank letter, the GOSI certificate.”*

0b

~15 s

0:10

Why it hurts

CLICK — **Why this matters ↓**, or scroll down to “The problem”.

POINT AT — The five manual steps, then the three numbers on the right.

SAY — *“Today a person opens every PDF, checks each company on the government websites by hand, and emails back and forth about expired certificates. That takes 18.8 days per supplier on average. And it's the main door for fraud: in a 2025 survey, three out of four US companies were hit by fake emails like this, typically ‘we changed banks, please pay this new account’.”*

0c

~5 s

0:25

The turn

POINT AT — The grey box under the numbers.

SAY — *“Big companies buy SAP Ariba. Most Saudi companies use their inbox. So we built an agent that works right there.”*

CLICK — Scroll back up, then **Start the guided demo**. If it isn't on the first step, click **Start over** once.

1

~20 s

0:30

Al Noor applies, and the agent finishes alone

CLICK — **Start: send the first email**. Wait until the button stops saying “Please wait…”.

POINT AT — The right panel, which reads each PDF and then says “Checked 17 things: all good”. Then the table, where two documents are in Arabic.

SAY — *“Four documents, two of them in Arabic. It read them, checked the government registries, matched the names and numbers, and approved Al Noor. No person needed.”*

2

~20 s

0:50

Rawabi: an expired certificate

CLICK — **Next supplier**

POINT AT — The yellow “Expired on…” row, then the email the agent wrote underneath.

SAY — *“A routine problem, so it doesn't bother anyone. It emails the supplier asking for exactly that document.”*

3
~10 s
1:10

Rawabi replies

CLICK **Rawabi replies**

POINT AT Rawabi turning green: “Onboarded · no person needed”.

SAY *“The reply comes in. It checks only the new document and approves them.”*

4
~20 s
1:20

Gulf Steel: the bank account belongs to someone else

CLICK **Next email**

POINT AT The red card, with the two company names side by side.

SAY *“The bank account belongs to a different company, a classic fraud pattern. The agent stops, doesn't contact the supplier, and asks me.”*

Don't press the buttons on this red card. Leave it open.

5
~25 s
1:40

A fake email asks to change Al Noor's bank

CLICK **Next email**

POINT AT The sender address (`.co` instead of `.com.sa`), the different bank, the red flags, then the phone number.

SAY *“Someone pretending to be Al Noor asks to redirect their payments. The agent can't change bank details at all. It freezes the request, holds payments, and tells me to call the number already on file.”*

6
~10 s
2:05

You call Al Noor and reject it

CLICK **Call Al Noor and reject**

SAY *“I called Al Noor. They never asked for this, so I reject it and nothing changes.”*

7
~20 s
2:15

Eleven months later

CLICK **Jump 11 months ahead**

POINT AT “Approved vendors” on the left.

SAY *“The job never ends. Al Noor's registration expires in 20 days, so it asks for the renewal now. Rawabi's certificate has lapsed, so their payments are on hold.”*

8
~25 s
2:35

The results

CLICK **Finish**, then scroll up a little.

POINT AT The green “How well it works” strip.

SAY *“We tested it on 57 cases it had never seen: 100% right decisions, every fraud attempt stopped, no honest supplier wrongly flagged, about 7 cents per supplier.”*

Tips

Wait for the green button
While it says “Please wait…”, the agent is still working. Each scene takes a few seconds.

Rehearse freely
Click **Start over** any time. Every run uses saved answers and costs nothing.

Keep the order
Use only the green button during the recording, not the “Manual controls”. The saved answers rely on the scenes running in order.

Recording in parts?
Don't click Start over between parts. Just continue with the next green button.

Speed it up later
In editing, speed up the waits between clicks 2–4× so the whole video stays under 3:00.

If something goes wrong

What you see	What to do
The page doesn't load	The app isn't running. Start it with the Terminal command in “Before you record”.
The button stays on “Please wait…” for more than 20 seconds	Refresh the page (Cmd + R), click **Start over**, and run the scenes again from the start.
“Something went wrong” appears under the button	A scene was run out of order. Click **Start over** and use only the green button.
Terminal says “address already in use”	The app is already running. Just open http://localhost:8000.
